HOW TO USE THIS REPORT

In the pages which follow, you will see descriptions of your character traits, relationship potentials and challenges, as well as career potentials, and even more.

All or most of these sometimes intimate descriptions will be linked in some way with your past lives and your experiences in the planetary realms between lifetimes (the interlife).

Yet, you may ask, how can this information best be used?

First, **HELP YOURSELF**. The enclosed uplifting commentary can only be truly beneficial if you see it as a means of self-help and self-transformation. So to get the maximum practical benefit out of each page of this report, focus on connecting what you read with what is going on in your life now.

Next, **LOOK FOR PATTERNS**. When you see repeated references -- for instance to similar careers, pursuits or vocations -- you should consider these references seriously. They demonstrate a positive karmic connection which you now have with these same career-related potentials from past life endeavors. So, because of prior life success, these areas of expression should be easier for you to find rewarding or to succeed in, as compared with in other areas.

Also, pay close attention to **REMEDIAL MEASURES**. For instance, you may be given an affirmation to use in meditation (or a prayer). Or you may be given a crystal/gemstone to wear. These means of balancing out challenging vibrations can indeed be very helpful, especially if used in a hopeful manner.

Finally, this report is a synthesis of past life and planetary interlife interpretations originally given clairvoyantly by Edgar Cayce, for individuals with your same planetary patterns at birth. So in applying this report to your personal life, you should **RESPECT INNER GUIDANCE** --through dreams, meditation and past life regression for example -- as primary resources for this kind of information; and most important, **RESPECT YOUR FREE WILL!** You alone must choose and know what is really best for you.

Your birth chart interpretation is based on the positions of the planets at the time of your birth.

Astrologer Ry Redd calculated on computer the astrology charts for hundreds of people who received readings by Edgar Cayce which contained astrologically based information. By studying these astrology charts, Ry Redd determined what planetary influences were most likely responsible for the readings by Edgar Cayce. In many cases the astrological basis of the Cayce readings appears to be very straightforward. From this information Ry Redd was able to develop, in conjunction with the computer programmers at Cosmic Patterns Software, an analysis of your birth chart as Ry Redd believes that Edgar Cayce's psychic readings would have interpreted it. Ry Redd's research effort was exhaustive and was conducted over many years, some of which was spent at the Edgar Cayce library at the Association for Research and Enlightenment headquarters in Virginia Beach, Virginia.

For the benefit of students of astrology, these positions, along with other technical information, are listed below:

Your Past Life Report begins on the following page . . .

Your Sun harmoniously aspects Neptune.

Your mystical, intuitive and spiritual sensitivity arises from your past lives, perhaps in early Roman times, or in the Egyptian/late Atlantean period. Then you may have been a seer with expertise in the religious mysteries of the day and in healing through the laying of hands. Your likely interest in group meditation, symbology, holistic health, and astrological timing arises from such past life experiences.

From your afterlife experience in the Neptune dimension, your imaginative urges create strong mystical impressions within you. At times, when you meditate or simply rest, the actions expressed in your visions and daydreams may elicit such intense emotions that you may feel as if you had actually experienced them.

Since Neptune is a higher octave of Venus, ruler of the arts, your Neptunian attunement and sensitivity give you abilities related to the arts in virtually any direction, whether as an actor, a dancer, an artist, musician or art critic.

Although you would do well in any creative endeavor, you are also gifted with healing power, especially in applying, for example, music and color to emotional disturbances. Hence, combining analytical or depth psychology with your creative and mystical sensitivities may suggest fields that will bring you deep understanding, if judged from the spiritual side.

You may also achieve a great deal through service for others, caring for others, helping those less fortunate. To be a channel of blessings to others is the purpose of every soul coming into the material world. For you particularly, serving others may have special rewards. If it is in keeping with your ideals, you would gain much in service involving an organized charitable institution or missionary branch of a church denomination. Public leadership involving large organizations through speaking to groups and writing is also indicated.

In addition, things that come over water or upon water are likely to be significant in your experience. Travel and law, especially in connection with these, should also be a portion of your activities. [997-1, 2835-1, 2483-2, 2855-1, 1442-1, 2326-1, 315-4]

Your Sun is sextile Uranus.

You have a great deal of originality, ingenuity, independence, and intuitive ability. Because of your exceptional intellectual and higher consciousness capabilities, to some people you seem inclined to be a dabbler into an extraordinarily wide variety of subjects, projects, and occupations (a Jack-of-all-trades, yet master of some). Your futuristic, scientific/technological as well as mystical, New Age interests are sometimes light years ahead of the mainstream. Your main motivation is likely to be helping others through your abiding interest in things psychological and astrological, especially in esoteric traditions.

Your afterlife experience in the Uranus dimension of awareness tends to make you an extremist. Feeling that anything worth doing is worth overdoing, you do not go at anything halfheartedly. Yet know that only in the Christ consciousness may extremes be brought together and made compatible with one another. Others may see you as taking rather circuitous routes to achieve your many pioneering goals, because you build your convictions gradually from careful evidence, although never losing sight of your goals.

Regardless of such outside skepticism as this, you have probably gained a lot in soul development in this experience. Just be sure to keep in mind a certain promise: if you turn within, through your prayer, meditation and dream life, you will know that your Redeemer lives. He is your Guide in correlating, centering, and coordinating your Uranian activities and interests.

Your most prominent past life was probably an Atlantean one, where you may well have been quite influential in unifying teachings for the moral, intellectual, and material uplift of others. In the present, you can best aid seekers -- whether beginners or advanced students, laymen, the great or the would-be great -- in knowing their true relationships to their souls, their God, and their overall purpose for being here, through the application of spiritual guidance and philosophy. You may be the greatest help to others by giving advice which aids them in their seeking for truth, without becoming dogmatic. Such an activity is likely to bring you the greatest blessings as well. [1210-1, 5145-1, 398-1, 2403-1, 2786-1]

Your Moon is conjoined with Sun.

The shadows of your experiences in the general solar system activity of the Sun and Moon have their influence upon your relationships and other activities this lifetime. Yet these influences from the Sun and Moon are only mental urges which arise. Along with inclinations from your between life experiences in the spheres of Mercury, Venus, Mars, Jupiter, Saturn, Uranus and Neptune, they express your overall soul individuality, rather than your emotional personality, which is from your previous incarnations in the earth.

Now, a conjunction of the Sun with the Moon occurs at the New Moon and a Full Moon occurs when the Moon is opposite the Sun. You chose to start a new earth life at the time of a New Moon. (If you were born just after the New Moon, you are likely to be more objective in your awareness than if born just before the New Moon, in which case you will be more subjective and reflective.)

Because the Sun rules your life or soul force, this key conjunction aspect gives you considerable vitality, with a tendency to go "all out" in whatever direction you choose to take in life.

In summary, you have risen high in your abilities, and unless there is continual application of your will respecting spiritual ideals, these very abilities you have maintained through the Sun's influence may become stumbling stones.

To insure that your abilities and experiences will instead be stepping stones for soul growth, keep your desires always in creative and constructive directions.

Above all, pray that the purposes of your heart will keep you in the direction of the Christ. "As I contemplate my associations with others, Lord, I find that I need to exercise the quality of detachment. My involvements seem literally to consume me at times, sapping my physical as well as emotional strength. I pray, therefore, to view things in a less personal way. Please help me control the tendency I have of getting completely caught up in the situations around me." [1958-1]

Your Moon harmoniously aspects Neptune.

You have such a highly developed imagination over many lifetimes to where you could easily be successful as an author/creator of mystical

symbolism or as a writer of inspirational literature and song. In addition to your special emotional sensitivity, you also have a sharp psychic feeling-awareness. Yet, being highly emotional, you may often allow your emotions or sentiments to run away with your better judgment, unless it is thoroughly grounded in ideals (and not ideas but ideals).

However, you will find that activities in any phase of endeavor require not only judgment but sacrifice; not sacrifice of principle, but a sacrifice of service so that there may be a more perfect understanding of your soul purpose this lifetime.

With your Moon in a resourceful, flowing pattern with watery Neptune, you will often have beneficial experiences involving spirituality, mysticism and creative inspiration. "Good karma" is then your lot this lifetime, opening up to you contacts with souls from past lives through whom you accomplished a great deal inwardly, say through spiritual channeling and healing as well as more outwardly in a lifetime as a mystical artist or temple musician.

Expect a lot of your resourcefulness in these areas to come through travel -- either by you or by others in your life -- near or over large bodies of water. Proximity to water, particularly the ocean and large lakes or rivers, is likely to enhance your spiritual attunement and personal centering.

Relative wealth and ease may also be part of your experience -- rather than poverty and hardship --but this moderate level of affluence and comfort in your lifestyle may well be from karmic earnings in past lives rather than through actual earnings in this life. That is, you may more than once find material benefits coming into your life through inheritances or through the labor and mental efforts of others (who may wish to sponsor or support you, for example).

The main drawback to this trait is an above average vulnerability to your emotional environment. Your health, even if only expressed in a tendency to put on weight or to have minor digestive problems, is then likely to require extra attention because of your susceptibility to conflict and pressure in your home or work environment.

One way you may control your sensitivity and make good use of your creativity at the same time is through bringing into the experiences of others,

especially in so-called "little" ways, that which is distinctly creative and constructive. You may also encourage those who have lost hope in spiritual ways of living. You would do this well in giving advice and counsel from the mental level (through the means suggested above, for instance)) which brings hope, help and love into the experiences of others. In addition to the good it will do others, you will through such efforts be creating for yourself positive karmic advantages for your next life. [1885-2]

Your Moon harmoniously aspects Uranus.

You are bringing into your present life highly original talents and concepts from your long ago lifetime in Atlantis. Your former soul sojourn in the unusual, individualistic dimension of Uranus carries your Atlantean talents and positive karma with others over into the present. This gives you brilliant, inventive, creative and inspirational leadership abilities in spiritual yet scientific, progressive and enduring "New Age" philosophical movements.

You are inclined to be very spiritually oriented, both outwardly and inwardly, but usually not at the same time. Great emotional influences also appear in your experience, but with an inclination outwardly to be cold and reserved rather than intensely emotional, yet having a great deal of emotion inwardly.

You have considerable power to heal others through the strong action of your touch and counsel, the genius of your teaching and the magnetism of your personality. You are likely to have an extraordinary life full of extremes and unexpected changes.

Through your keen, virtually psychic level of intuition and mental alertness, you will probably make a distinct opportunity out of every obstacle you encounter by willfully converting each stumbling block into a stepping stone toward the Light. Such a positive approach to life is uniquely your own and is something that you certainly should share with others in need of upliftment and inspiration. [1089-3, 1958-1, 633-2]

Your Mars is conjoined with Saturn.

You are always busy, both with your hands and with your mind. Your ambition, power drive and energy will always require a great deal of direction in the spiritual rather than the material or financial area of your life.

However, because of a likely misuse in past lives, power may be denied you in this lifetime unless you put all your trust, purpose and hope in the Christ and His ways. Your tendency to worry and become blocked over situations in which others disappoint you can be cleared up by trust in His power working with you.

Now, Mars is the consciousness dimension concerned with activity and applied energy related to material things. Positive expressions of Martian energy include courage, valor and clean competitiveness. Negative expressions are usually manifested emotionally as aggression and anger.

On the other hand, Saturn is the realm of remodeling by the necessity for change. Martian energy is often restricted; for it must work within the common sense boundaries of Saturn's urge for change and growth.

This interplay of the forces of Mars and Saturn may manifest outwardly as inertia on one hand or as serious challenges raised by those with whom you are associated, especially in career and financial decisions. The problematic activities of those who oppose you are likely to involve their anger as well as your own, or drives to satisfy personal wishes.

In Saturn is therefore found many changes in your associations and activities with others, along with changes in your purposes and guiding ideals. As these somewhat traumatic changes have come in your life, your first reaction has probably been one of confusion. At these times you can always CHOOSE whether or not to become involved in problems with others which cause you to lose your hold on the real Life in you as manifested through the Christ-Consciousness.

These personal power challenges are likely to remain with you until you choose to recognize Saturn's potential for positive changes. Do this through losing your self wholly in the Christ and His purposes in always doing for others. Consider not what others can do for you, but what you might do for them. [3573-1, 1438-1]

NOTE: The Zodiac signs of the Sun and Moon are analyzed below. First they will be analyzed in

the Tropical zodiac. If the positions are different in the Sidereal zodiac, then they will also be analyzed in the Sidereal zodiac. Also, if the Sun and Moon are in the same zodiac sign, then only the Sun position is interpreted; the Moon position, being the same as the Sun position, does not need to be interpreted in this case.

Your Sun is in Pisces (Tropical zodiac).

Coming under the influences of Pisces, water and religion or spiritual matters are likely to have an untold influence on you. Of course, this depends upon the way you respond to these kinds of experiences, for they have probably played an important part or at least have been innate in your experience through many lifetimes in the earth.

Pisces means or symbolizes what is naturally, or by its very nature, representative of influences of the higher soul or higher spiritual level. Hence those things of the spiritual nature should preferably be the way in which your judgments are drawn, as to whether this or that activity should be your impelling influence. Not that you should become lost in motives or in influences impelling your actions: just use those things of the spiritual import as the measuring rod of your activities and experiences.

In light of this, the period around the birth and ministry of Jesus, the Christ, is the clearest past life for you to recall and build upon in the present. You may even remember a lifetime as part of Roman culture, where priority was placed upon position in society and in the military.

Another early Church memory might be stronger for you: the hills around Galilee and the desert near the Dead Sea where the Essenes and others gathered to meditate and study. Then too you may be emotionally drawn to painful scenes of being among early Christians who were martyred for the courage of believing in the Messiah. Regardless of specifics, you are quite likely always to be dominated by a sense of expectancy and mystery.

In later lifetimes since the early Church period, you were probably celibate, as a nun or monk of a leading religious order.

Noble, compassionate Jupiter and spiritual, mystical Neptune are the two rulers or key symbols for the sign of Pisces. From Neptune comes the intuitive forces, the mystical or mysterious influences in your experience, whether you allow them to be mentally or consciously active or not. Another influence of these planets as expressed through Pisces is that although you have a great deal of compassion, you may be too passive in expressing your personal energy and soul force. Also, it will probably be much easier for you than for most people to suppress your sexual desires because of the memory of one or more past lives when you set aside your personal concerns for the good of the entire community. [816-3, 1506-1, 997-1]

Your Sun is in Aquarius (Sidereal zodiac).

Aquarius makes for the application of your mental self, so that there are tendencies for you to analyze carefully any given project, or any undertaking dealing with the material world. Also, the more often you undertake projects when others must be considered as well, it will be far better that you manifest a truly cooperative spirit while doing so.

The planet ruled or symbolized by Aquarius is Uranus, which is the purely Atlantean planet. In other words, Uranus is the principal theme of Aquarius, and because Uranus is the realm of a distinctive Atlantean nature, then Aquarius is the zodiacal sign best symbolized by thoughts, personalities and activities akin to the series of prehistoric "space age" civilizations known as Atlantis.

For example, you may once have been involved with scientific discovery and invention, and therefore in the present have the potential again for investigating more scientific or technical areas like computers, engineering, inventing, research, astrology and parapsychology, space travel and the like.

Other similar experiences and abilities with high technologies ranging from electronics in medicine to communications are close to you in terms of your interests and abilities, yet are far away in time. This is also true of a great number of souls who have incarnated in the twentieth century (especially since World War Two), with memories spanning many millennia between the present time and the ancient Atlantean civilizations.

Yet other lifetimes have surely intervened since your Atlantean

incarnation. They could range from being an astrologer or magician in the courts of kings to a dedicated pioneer at the frontier of a new land. Or you may have been one who set sail for distant ports only to be carried away in search of lost legends. Other lives, including the present one, could well feature you as one whose stride through life has labeled you as a dreamer, at least to more material-minded souls. [1265-1, 3902-2]

Your Past Life Decanates

According to an ancient Vedic astrology method still practiced in India, Past Life Planets are realms in which you sojourned between earth lifetimes. They are identified through the position of your sidereal Sun and Moon in the decanates (a decanate is a one-third division of a zodiac sign; each is ruled by a planet). Any patterns involving these Past Life Planets are therefore of special importance. Pay extra attention, then, to any sections of your Report which interpret these planets.

NOTE: If your Sun and Moon are both located in a decanate which is ruled by the same planet, then only the Sun position is interpreted; the Moon's decanate position, being the same as the Sun's, therefore does not need to be interpreted.

Your Sun is in Libra Decanate

Your sidereal Sun in LIBRA decanate, which is ruled by Venus. Venus as Past Life Planet points to high priorities in creativity, sociability and relationships, especially in your family/home life and in the world of nature. Urges toward these experiences and interests from your sojourn in the Venus dimension are likely to originate in parallel lifetimes of soul development through these areas of self-expression.

Especially indicated are lives in the early Jewish-Christian Church and later as an artist-musician in modern times, whether in the West (Europe and/or America), or in modern or colonial Asia.

Your Moon is in Pisces Decanate

Your sidereal Moon is in the decanate of Pisces, which is co-ruled by Neptune and Jupiter. This points to prominent soul journeys in the interlife realms of Jupiter and Neptune, and to one or more parallel lifetimes in which you were dedicated to spirituality, humanitarian, healing-oriented and spiritual.

mystical endeavors. Your experiences then may have brought you prominence or notoriety in spiritual causes ranging from the Essenes and Gnostics around the time of Christ to Eastern temples and ashrams and later, medieval or modern monastic life.

Of likely special interest to you in your present life are mysticism, spirituality and most movements toward Oneness and the mysteries of Life and Nature, including dreams and mystical kinds of music and art. These interests and urges are intensified from lifetimes where the sea or large bodies of water played a large role, as well as from your soul experiences between earth incarnations in the realms of Neptune and Jupiter.
